Introduction

StarSoft is a medium size software development company, formed in November 1994 with a mission to serve its valued customers in the best possible way with all the resources available.

In the beginning StarSoft dealt only in database solution development using FoxPro as development tool. Today, it has grown into a total solution provider company, specializing in services ranging from Information System Consulting to Networking, from Software Development to Education & Training and Human Resource Development utilizing the best tools and skills.

We have futuristic designs and are on our way to be the best software developer and leader in IT industry through our superior expertise, dedicated staff, and excellent relations with the customers. We are going to set the trend where our clients will consider us one of the major forces behind their success, progress and prosperity.

The StarSoft ensures best of backup support after developing and installing the software. We extend our services even beyond our contract limits. Let us serve you in the most modern industry (IT) in our traditional way of hospitality.

We solve the complex problems in most sophisticated manner with amazing ease and make business problems handling a joyous task.
